DALTON KOH

Game Development Internship

daltonkoh@gmail.com | +(65) 8252 3896 | Singapore

daltonkoh.github.io | linkedin.com/in/dalton-koh

SUMMARY

- Contributed gameplay, audio and interaction systems across 3 team projects, using Unity, Godot and a custom engine to turn design ideas into working prototypes.
- Connected engine audio to gameplay across 2 languages, C++ and C#, enabling scripts, menus and scene changes to control sound in Echoes Below.

EXPERIENCE

Republic of Singapore Air Force | Sep 2015 - May 2021

Aircraft Maintenance Engineer

- Supported frontline F-15 operations for over 5 years, performing pre-flight and post-flight inspections and weapon-loading duties to contribute to aircraft readiness.

PROJECTS

Beyond Us | Godot | Team project

- To communicate world damage, built destruction tracking and progressive scene effects linked to 1 event-driven ending; integrated animation, collisions and audio for player and NPC feedback.

Nookified | Unity, C# | Team project

- Built 2 placement controls, grid snapping and camera-relative movement, to position furniture; added polygon editing, curved corners and pillar cut-outs so users could customise room layouts.

GrapeEngine and Echoes Below | C++, C#, FMOD | Team project

- Integrated 3 audio features, fades, low-pass filtering and spatial audio, through FMOD in the team engine; added mixer controls, C# bindings, menus and scene crossfades for controllable sound.

EDUCATION

DigiPen Institute of Technology Singapore | Sep 2024 - May 2028

Computer Science in Interactive Media and Game Design | Expected May 2028

Activities: participated in 2 Level Up hackathons at *SCAPE, Orchard, in 2026.

SKILLS

- Applied 2 programming languages, C# and C++, alongside Unity, Godot and FMOD to implement gameplay, audio and interfaces in team prototypes.
- Used 4 prototyping and collaboration tools, Figma, Unreal Engine, GitHub and Jira, to explore ideas, share work and track project tasks.
